# Cut out the planets in this page and place them in the corresponding order in the map provided.

DID YOU KNOW?

WHAT A FORCE
A dime-size magnet has enough electromagnetic force to overcome all of Earth's gravity and stick to the fridge.

KEEP DIGGING
How many miles is the Earth's diameter?

The diameter of the Earth is 7,917.5 miles.

MOON POWERS
High and low tides are caused by the Moon's gravitational pull. High tides occur on the sides of Earth that are closest and farthest from the Moon.

BIG RED
Mars, the red planet is home to the highest mountain in the solar system. Olympus Mons is roughly 17 miles high - three times as tall as Mount Everest.

THAT'S A LOT
How many Earths can fit in the Sun?

1.3 million Earths. The Sun makes up 99.86% of the mass of the Solar System.

WONDERWORKS

Can you **arrange** and **name** all
the planets in our solar system?
